

# Why more scientists rely on Wyatt instruments to measure macromolecules.

Wyatt instruments are up to 25 times more precise.

The simple answer is that Wyatt multi-angle light scattering detectors are up to 25 times more precise than the competition.

In fact, using a Wyatt DAWN® instrument is the only way to *directly* measure molecular weights and sizes without column calibration or reference standards.

But that's just part of the story. Wyatt also offers the widest range of instruments, providing equally superior measurements for all sample types, from polymers and

**Our staff, including ten PhD scientists, provides unmatched service, support and training.**

proteins to carbohydrates and particles. And because

we provide the only multi-angle modular solution, you can choose only the detectors you need. You can read all about it in more than 1000 peer-reviewed articles that cite Wyatt instruments.

Maybe that's why 28 of the top 30 chemical, pharmaceutical and biotechnology companies choose Wyatt instruments. Or why **all** major federal regulatory agencies and national laboratories use Wyatt.

Since 1968, when Wyatt first commercialized laser light scattering, our instruments

**Wyatt instruments are cited in 80 times as many peer-reviewed articles.**

have helped thousands of scientists, from Nobel laureates to members of the National Academy of

**Scientists choose Wyatt instruments ten to one over the competition.**

"I am grateful beyond description for your state-of-the-art technology."

While we appreciate his comment, we're just as enthusiastic about our service, support and training. Our three-day, all-expenses-paid Light Scattering University® course in Santa Barbara, California is designed to give you the greatest proficiency with our instruments in the least amount of time (*U.S. customers only*).

We also provide ongoing access to our ten PhD scientists with broad expertise in liquid chromatography, polymer chemistry, protein science, biochemistry and light scattering. So no matter what challenge you face, our staff will help you find the solution.

For more information on our full range of instruments, worldwide dealer network, applications, and a bibliography of light scattering papers, please call 805-681-9009 or visit us at **wyatt.com**. And see for yourself why more scientists rely on Wyatt instruments.

Sciences to researchers in over 50 countries worldwide. One corporate scientist recently wrote us to say

**Only Wyatt designs and manufactures all of its hardware and software.**
